Subject: Letter of Recommendation

We wanted to have a quick, secure and cost effective communication with our European customers and hence we took a decision to implement EDI solutions. For providing these solutions, we wanted to partner with the market leaders in EDI solutions. We found a perfect partner in Tangentia India Technologies Pvt Ltd.

The EDI solutions provided by Tangentia were timely, efficient and using best practices in the development work. They moved our project along quickly and kept us agile enough to be competitive.

We are constantly impressed by their technical expertise and work ethic. The service support has been amazing as they always make the extra effort to ensure our requirements are met.

We value our relationship with Tangentia. I would recommend them to anyone.

Yours faithfully

Rahul Nalawade
